

FOR IMMEDIATE RELEASE

SIGHTSPEED OFFERS VOIP/VIDEO CONFERENCING SERVICE TO INTEL DESKTOP BOARD CUSTOMERS

Consumers and Small Businesses to Benefit from SightSpeed's Clarity and Ease of Use

Berkeley, Calif. – June 20, 2005 – SightSpeed, Inc., the leader in high-performance video calling services for consumers and small businesses, today announced the availability of its award-winning service to Intel Desktop Board customers. Through this offer, Intel system integrators can bring SightSpeed's high-quality, VoIP/video conferencing service directly to their customers, enabling them to differentiate their products by including a top-rated Internet service. This is the second offer for SightSpeed through Intel announced this month.

“Intel is committed to providing the PC industry with the most innovative tools for building high-quality computing systems,” says Joel Christensen, director of marketing, Intel Desktop Board Operations. “SightSpeed's VoIP/video conferencing service is an ideal service for PC users who want to stay in close contact with business associates or family.”

The ongoing offer includes three options for Intel Desktop Board customers. They can choose the quick start global offer, which provides 60 free days of using SightSpeed's Multi-Freedom Plan. After 60 days, customers will have the option to purchase the discounted Multi-Freedom plan at \$10.95 a month or \$100.95 for one year. Another option is the SightSpeed complete starter kit, which includes a disk to download the software, a web camera and a headset. Intel Desktop Board customers may also select the SightSpeed no risk trial offer, which includes a “pay as you go” plan. Customers will receive the SightSpeed hardware, but must commit to this plan for one year.

“Face-to-face communication is crucial for maintaining relationships and it is our goal to make SightSpeed available to as many computer users as possible,” said Brad Treat, CEO of SightSpeed. “By working with Intel, we continue to expand the reach of SightSpeed far and wide to consumers and small business users.”

About SightSpeed, Inc.

Based in Berkeley, California, SightSpeed offers Internet-based visual and audio communications combining ease-of-use and the highest quality experience, at speeds equal to real life. SightSpeed's award-winning, instantly available software is the only

one to deliver voice and video at 30 frames per second over broadband without delay — providing clear, precise, natural communications. SightSpeed's software is easy to install and use with standard computers, cameras and a broadband Internet connection. Its revolutionary human perception-based technology is patented and based on over seven years of research at Cornell University. SightSpeed is accessible on Internet-connected computers, and can also be licensed for embedded commercial applications. For more information, visit <http://www.sightspeed.com>
