

For Immediate Release

**SIGHTSPEED PARTNERS WITH LEADING JAPANESE
INTERNET SERVICE PROVIDER TO BRING AFFORDABLE VIDEO
CALLING TO CONSUMERS IN JAPAN**

Through an Alliance with GMO Internet Corporation, SightSpeed's Fun, Easy-to-Use Internet Video Calling Service Delivers the Next Wave of Broadband Communications to Families and Friends in Japan and the People They Care About Around the World

Berkeley, Calif., – July 14, 2005 – SightSpeed, Inc., the award-winning service that turns your PC into an easy-to-use voice and video phone, today announced an agreement with Global Media Online (GMO), the second largest Internet service provider in Japan. Under the terms of the agreement, GMO users will receive a special free trial offer from July 13 to August 31 of SightSpeed's award-winning, Internet video calling service. With SightSpeed, GMO users can enjoy unlimited audio and one-to-one video calls, try four-way multi-party calling, and create and send video messages to friends and family in Japan or anywhere in the world.

“With family and communication among the strongest cultural values in Japan, SightSpeed Video Calling is already a success with Japanese consumers looking for a fun and easy way to stay in touch with family and friends,” said Brad Treat, CEO of SightSpeed. “The alliance with GMO extends SightSpeed's penetration into the dynamic Japanese market and enables GMO's substantial user base to participate in the next wave of broadband communication.”

A free Japanese trial version of SightSpeed is available at <http://gmo.sightspeed.jp/>.

SightSpeed, Inc.

Based in Berkeley, California, SightSpeed turns your PC or Mac into an easy-to-use video phone. SightSpeed is software that you download from the Internet or install from a CD that enables your PC to send and receive voice and video calls, video mail, and text messaging. Customers who have downloaded the SightSpeed client register for the SightSpeed Service plan that best fits their needs (including the free SightSpeed Basic plan) to start making video calls to friends, family, and colleagues around the world. SightSpeed's software is easy to install and works with standard computers and broadband Internet connections such as DSL or cable models. It also has a 56K dial-up speed setting. SightSpeed's revolutionary human perception-based technology is patented and based on over seven years of research at Cornell University. For more information, visit <http://www.sightspeed.com>.
