

For Immediate Release

SIGHTSPEED EXTENDS REACH THROUGH DIGITAL HOME STARTER KIT AT COMPUSA®

*High-Quality Service Provides Fun, Easy Way to Share Smiles and Stories with the
People You Care About, Wherever They Live*

Berkeley, Calif. – August 15, 2005 – SightSpeed, Inc., the award-winning service that turns your PC or Macintosh into easy-to-use voice and video phone, today announced SightSpeed 4.0 availability at CompUSA® through an agreement with Intel Corporation. CompUSA customers purchasing any desktop PC with an Intel® Pentium® 4 processor, will receive a Digital Home Starter Kit CD that includes a free, 90-day trial of SightSpeed. With SightSpeed, a web camera and a new PC with Intel Pentium 4 processor supporting Hyper-Threading Technology, consumers can turn their PC or Mac into a video phone and share smiles and stories with far-flung friends, family, and colleagues.

“Today’s computer users are looking for ways to enhance their communications experience, which has increased the popularity of Internet-based voice and video calling,” said Melissa Laird, general manager of Intel’s Developer Relations Division. “We are pleased that through participation in the Intel® Early Access Program SightSpeed has been able to take advantage of powerful Intel Pentium 4 processor-based technology to help enable CompUSA customers to enjoy quality Internet voice and video calls worldwide.”

The Digital Home Starter Kit offer from CompUSA is available from July 1 through September 1, 2005. During the 90-day trial period of SightSpeed’s Freedom plan, customers can create and send up to 100 video emails per month, enjoy unlimited 1-to-1 voice and video calling, as well as unlimited use of video voice mail. Additionally, SightSpeed extends service plan discounts to friends, family, and colleagues of Digital Home Starter Kit customers. After the trial, Digital Home Starter Kit customers can continue using SightSpeed’s Freedom Plan at a discounted rate.

“This special offer with Intel and CompUSA will enable people to share their summer 2005 memories face-to-face with friends and family around the world right from their PC,” said Brad Treat, CEO of SightSpeed. “Today’s announcement is another milestone for SightSpeed in extending the distribution of our top-rated service to PC users everywhere.”

About SightSpeed, Inc.

Based in Berkeley, California, SightSpeed turns your PC or Mac into an easy-to-use video phone. SightSpeed is software that you download from the Internet or install from a CD that enables your PC to send and receive voice and video calls, video mail, and text messaging. Customers who have downloaded the SightSpeed client register for the SightSpeed Service plan that best fits their needs (including the free SightSpeed Basic plan) to start making video calls to friends, family, and colleagues around the world. SightSpeed’s software is easy to install and works with standard computers and broadband Internet connections such as DSL or cable models. It also has a 56K dial-up speed setting. SightSpeed’s revolutionary human perception-based technology is patented and based on over seven years of research at Cornell University. For more information, visit <http://www.sightspeed.com>.
